

Survey about Microcystic Lymphatic Malformation (mLM) and Cutaneous Venous Malformation (cVM)

Share your experience with us

Are you an adult, adolescent, or caregiver of a child who is living with Microcystic Lymphatic Malformation (mLM) or Cutaneous Venous Malformation (cVM). Clinical Outcomes Solutions (COS) is a healthcare research company partnering with a pharmaceutical company (Sponsor). COS is conducting an online research study to learn more about the questionnaires people with mLM or cVM will use to test new treatments. We need your help!

About the Study:

- **Who?** Adults, Adolescents (12 years and up) and Caregivers of children 3 to 11 years with Microcystic Lymphatic Malformation (mLM) or Cutaneous Venous Malformation (cVM).
- **What?** One online survey where you will provide your feedback on assessments used in clinical studies to test new treatments.
- **Where?** Conducted online at your convenience.

The results of the survey research study will help inform the Sponsor about the assessments used for those with mLM or cVM during clinical studies.
